## SUMMARY

Full Stack Developer with 4+ years of experience (1 year professional, 3+ years freelance) in web and mobile app development. Skilled in Laravel, .NET, Next.js, React.js, and React Native, with strong expertise in REST API development, scalable architecture, and system performance optimization.

## WORK EXPERIENCE

**PT. Toho Technology Indonesia - Software Engineer**                      Nov 2024 - Present
- Built and maintained full stack web and mobile applications (.NET, Next.js, React Native).
- Designed database architecture and ensured system performance.
- Integrated PLC systems via MQTT protocol for real-time data exchange.

**Freelancer - Fullstack Developer**                                       Jan 2021 - Present
- Built web apps with Laravel and React.js, and mobile apps using React Native for multiple clients.
- Designed REST APIs and implemented secure, scalable solutions.
- Managed complete project cycle from planning to deployment.

**STT. Wastukancana - Web Developer**                                      Jan 2022 - Aug 2022
- Developed and maintained web applications using CodeIgniter 3 framework.
- Assisted in implementing and testing new features to ensure functionality and performance.
- Collaborated with team members to troubleshoot and fix bugs during development cycles.

## EDUCATION

**Bachelor of Science in Informatics Engineering**                        Sep 2020 - Nov 2024
Sekolah Tinggi Teknology Wastukancana
- Specialized in software development, database design, and web/mobile application programming.

**Vocational High School in Software Engineering**                        Aug 2015 - Aug 2019
SMK Kharisma Nusantara
- Focused on software engineering fundamentals and application development.

## ADDITIONAL INFORMATION
